CONTENTS OF VOLUME 48

Number 1

G. PUGLISI and L. TRUSKINOVSKY	1	Mechanics of a discrete chain with bi-stable elements
H. J. BUNGE, R. KIEWEL, Th. REINERT and L. FRITSCHE	29	Elastic properties of polycrystals—influence of texture and stereology
A.-F BASTAWROS and K.-S KIM	67	Experimental analysis of near-crack-tip plastic flow and deformation characteristics (I): Polycrystalline aluminum
Y. HUANG, H. GAO, W. D. NIX and J. W. HUTCHINSON	99	Mechanism-based strain gradient plasticity—II. Analysis
S. IM and K.-S. KIM	129	An application of two-state M-integral for computing the intensity of the singular near-tip field for a generic wedge
D. HOMENTCOVSCHI and C. DASCALU	153	Uniform asymptotic solutions for lamellar inhomogeneities in plane elasticity
S. A. SILLING	175	Reformulation of elasticity theory for discontinuities and long-range forces

Number 2

Z. SUO and W. LU	211	Composition modulation and nanophase separation in a binary epilayer
S. SOCRATE and M. C. BOYCE	233	Micromechanics of toughened polycarbonate
Y.-C. CHEN and D. C. LAGOUDAS	275	Impact induced phase transformation in shape memory alloys

A-F. BASTAWROS, H. BART-SMITH and A. G. EVANS — 301 — Experimental analysis of deformation mechanisms in a closed-cell aluminum alloy foam

C. MIEHE and J. KECK — 323 — Superimposed finite elastic–viscoelastic–plastoelastic stress response with damage in filled rubbery polymers. Experiments, modelling and algorithmic implementation

H. PETRYK — 367 — General conditions for uniqueness in materials with multiple mechanisms of inelastic deformation

O. SIGMUND — 397 — A new class of extremal composites

Number 3

Y.-P. PELLEGRINI, M. BARTHÉLÉMY and G. PERRIN — 429 — Functional methods and effective potentials for non-linear composites

L. V. GIBIANSKY and O. SIGMUND — 461 — Multiphase composites with extremal bulk modulus

M. M. AGHDAM, D. J. SMITH and M. J. PAVIER — 499 — Finite element micromechanical modelling of yield and collapse behaviour of metal matrix composites

J. Y. LI — 529 — The effective electroelastic moduli of textured piezoelectric polycrystalline aggregates

V. A. LUBARDA and X. MARKENSCOFF — 553 — Conservation integrals in couple stress elasticity

S. CHAÏEB and F. MELO — 565 — From creases to conical deflections in a buckled thin sheet: stress focusing vs singularities in strong deformations of a thin elastic sheet

P. ROSAKIS, A. J. ROSAKIS, G. RAVICHANDRAN and J. HODOWANY — 581 — A thermodynamic internal variable model for the partition of plastic work into heat and stored energy in metals

J. WU and V. GUPTA — 609 — Observations of transonic crack velocity at a metal/ceramic interface

C. M. LANDIS, I. J. BEYERLEIN and R. M. MCMEEKING 621 Micromechanical simulation of the failure of fiber reinforced composites

Number 4

V. B. SHENOY, R. PHILLIPS and E. B. TADMOR 649 Nucleation of dislocations beneath a plane strain indenter

C. GONZÁLEZ and J. LLORCA 675 A self-consistent approach to the elasto-plastic behaviour of two-phase materials including damage

C. Q. RU 693 Exact solution for finite electrode layers embedded at the interface of two piezoelectric half-planes

J. W. HUTCHINSON, M. Y. HE and A. G. EVANS 709 The influence of imperfections on the nucleation and propagation of buckling driven delaminations

I. MOHAMMED and K. M. LIECHTI 735 Cohesive zone modeling of crack nucleation at bimaterial corners

P. CERMELLI and S. SELLERS 765 Multi-phase equilibrium of crystalline solids

B. BOURDIN, G. A. FRANCFORT and J-J. MARIGO 797 Numerical experiments in revisited brittle fracture

L. I. SLEPYAN, V. I. KRYLOV and R. PARNES 827 Helical inclusion in an elastic matrix

I Keywords

Number 5

L. G. ZHAO, T. J. LU and N. A. FLECK 867 Crack channelling and spalling in a plate due to thermal shock loading

C. RUBIO-GONZALEZ and J. J. MASON 899 Dynamic stress intensity factors at the tip of a uniformly loaded semi-infinite crack in an orthotropic material

L. I. SLEPYAN 927 Dynamic factor in impact, phase transition and fracture

Y. WANG and A. M. CUITIÑO 961 Three-dimensional nonlinear open-cell foams with large deformations

M. E. GURTIN 989 On the plasticity of single crystals: free energy, microforces, plastic-strain gradients

Z. J. WU, J. Q. YE and J. G. CABRERA 1037 3D analysis of stress transfer in the micromechanics of fiber reinforced composites by using an eigenfunction expansion method

A. BHATTACHARYYA and E. J. APPIAH 1065 On the exact solution of elastoplastic response of an infinitely long composite cylinder during cyclic radial loading

I Keywords

Number 6/7
Special Issue: The J. R. Willis 60th Anniversary Volume

v Preface

vii Bibliography

xi Publication list

R. HILL 1093 Plastic anisotropy and the geometry of yield surfaces in stress space

Z. CEDRIC XIA and J. W. HUTCHINSON 1107 Crack patterns in thin films

H. H. M. CLEVERINGA, E. VAN DER GIESSEN and A. NEEDLEMAN 1133 A discrete dislocation analysis of mode I crack growth

L. B. FREUND 1159 Substrate curvature due to thin film mismatch strain in the nonlinear deformation range

O. P. BRUNO and G. H. GOLDSZTEIN 1175 Numerical simulation of martensitic transformations in two- and three-dimensional polycrystals

R. MASSON, M. BORNERT, P. SUQUET and A. ZAOUI 1203 An affine formulation for the prediction of the effective properties of nonlinear composites and polycrystals

J. W. MORRISSEY and J. R. RICE 1229 Perturbative simulations of crack front waves

V. S. DESHPANDE and N. A. FLECK 1253 Isotropic constitutive models for metallic foams

D. R. S. TALBOT 1285 Improved bounds for the effective properties of a nonlinear two-phase elastic composite

G. W. MILTON and S. K. SERKOV 1295 Bounding the current in nonlinear conducting composites

V. P. SMYSHLYAEV and K. D. CHEREDNICHENKO 1325 On rigorous derivation of strain gradient effects in the overall behaviour of periodic heterogeneous media

W. J. DRUGAN 1359 Micromechanics-based variational estimates for a higher-order nonlocal constitutive equation and optimal choice of effective moduli for elastic composites

P. PONTE CASTAÑEDA and E. TIBERIO 1389 A second-order homogenization method in finite elasticity and applications to black-filled elastomers

Y. A. ANTIPOV, A. B. MOVCHAN and N. V. MOVCHAN 1413 Frictional contact of a fibre and an elastic solid

D. BIGONI, B. LORET and E. RADI 1441 Localization of deformation in plane elasticplastic solids with anisotropic elasticity

M. D. NESTOROVIĆ, Y. M. LEROY and N. TRIANTAFYLLIDIS 1467 On the stability of rate-dependent solids with application to the uniaxial plane strain test

K. BHATTACHARYA and G. DOLZMANN 1493 Relaxed constitutive relations for phase transforming materials

G. FRIESECKE and R. D. JAMES 1519 A scheme for the passage from atomic to continuum theory for thin films, nanotubes and nanorods

S. NEMAT-NASSER 1541 A micromechanically-based constitutive model for frictional deformation of granular materials

I Keywords

Number 8

A. ACHARYA and J. L. BASSANI 1565 Lattice incompatibility and a gradient theory of crystal plasticity

A. E. GIANNAKOPOULOS and P. PALLOT 1597 Two-dimensional contact analysis of elastic graded materials

J. H. SMITH and J. WOODHOUSE 1633 The tribology of rosin

R. HILL 1683 Constitutive modelling of path-dependent plastic behaviour at large strains

L. ANAND and C. GU 1701 Granular materials: constitutive equations and strain localization

O. RICHMOND and S. ALEXANDROV 1735 Nonsteady planar ideal plastic flow: general and special analytical solutions

A. TROCHIDIS, E. DOUKA and B. POLYZOS 1761 Formation and evolution of persistent slip bands in metals

A. MENZEL and P. STEINMANN 1777 On the continuum formulation of higher gradient plasticity for single and polycrystals

1797 Announcement

Number 9

V. NESI, V. P. SMYSHLYAEV and J. R. WILLIS 1799 Improved bounds for the yield stress of a model polycrystalline material

R. LUCIANO and J. R. WILLIS 1827 Bounds on non-local effective relations for random composites loaded by configuration-dependent body force

B. AUDOLY 1851 Asymptotic study of the interfacial crack with friction

N. A. FLECK and L. G. ZHAO 1865 Microbuckle tunnelling in fibre composites

P. A. TZIKA, M. C. BOYCE and D. M. PARKS 1893 Micromechanics of deformation in particle-toughened polyamides

M. F. BEATTY and S. KRISHNASWAMY 1931 A theory of stress-softening in incompressible isotropic materials

S. BASU and R. NARASIMHAN 1967 A numerical investigation of loss of crack tip constraint in a dynamically loaded ductile specimen

A. GRIMALDI and R. LUCIANO 1987 Tensile stiffness and strength of fiber-reinforced concrete

Number 10

S. D. MESAROVIC and K. L. JOHNSON 2009 Adhesive contact of elastic–plastic spheres

K. UETANI, M. KOBAYASHI and Y. ARAKI 2035 Symmetry limit theory for elastic-perfectly plastic continua in the shakedown region

S. LIN, D. A. HILLS and P. D. WARREN 2057 A theoretical investigation of sharp indentation testing of a nearly-brittle material, with some experimental results

M. ORTIZ, E. A. REPETTO and L. STAINIER 2077 A theory of subgrain dislocation structures

J. R. DRYDEN 2115 On the creep in ceramics due to a viscous grain boundary phase

D. LEGUILLON, C. LACROIX and E. MARTIN 2137 Interface debonding ahead of a primary crack

Z. XIANGYANG, S. QINGPING and Y. SHOUWEN 2163 A non-invariant plane model for the interface in CuAlNi single crystal shape memory alloys

K. GALL, M. F. HORSTEMEYER and M. VAN SCHILFGAARDE 2183 Atomistic simulations on the tensile debonding of an aluminum–silicon interface

A. ACHARYA and A. J. BEAUDOIN 2213 Grain-size effect in viscoplastic polycrystals at moderate strains

I Keywords

Number 11

Y. F. DAFALIAS 2231 Orientational evolution of plastic orthotropy in sheet metals

S. SHEN and T. NISHIOKA 2257 A unified method for subsonic and intersonic crack growth along an anisotropic bimaterial interface

C. H. WU and M. L. WANG 2283 The effect of crack-tip point loads on fracture

M. K. WADEE and A. P. BASSOM 2297 Characterization of limiting homoclinic behaviour in a one-dimensional elastic buckling model

B. AUDOLY 2315 Mode-dependent toughness and the delamination of compressed thin films

E. P. BUSSO, F. T. MEISSONNIER and N. P. O'DOWD 2333 Gradient-dependent deformation of two-phase single crystals

C. S. JOG, R. SANKARASUBRAMANIAN and T. A. ABINANDANAN 2363 Symmetry-breaking transitions in equilibrium shapes of coherent precipitates

J. M. AMBRICO and M. R. BEGLEY 2391 Plasticity in fretting contact

R. ABDELMOULA and J.-J. MARIGO 2419 The effective behavior of a fiber bridged crack

I Keywords

Number 12

J. C. CRISCION, J. D. HUMPHREY, A. S. DOUGLAS and W. C. HUNTER 2445 An invariant basis for natural strain which yields orthogonal stress response terms in isotropic hyperelasticity

T. PARDOEN and J. W. HUTCHINSON	2467	An extended model for void growth and coalescence
M. X. SHI, Y. HUANG and K. C. HWANG	2513	Fracture in a higher-order elastic continuum
P. H. LEO and M. H. SCHWARTZ	2539	The energy of semicoherent interfaces
A. CHENAOUI, F. SIDOROFF and A. HIHI	2559	The texture evolution of a planar polycrystal
R. ESTEVEZ, M. G. A. TIJSSENS and E. VAN der GIESSEN	2585	Modeling of the competition between shear yielding and crazing in glassy polymers
N. K. SIMHA and K. BHATTACHARYA	2619	Kinetics of phase boundaries with edges and junctions in a three-dimensional multi-phase body
	XIII	Keywords
